Embodied AI · Reinforcement Learning · World Models

EDUCATION

University of Electronic Science and Technology of China (UESTC) · B.S. in Computer Science and Technology, Zhufeng Honors Program
Undergraduate Sep. 2025 – Present

- Average: **95.22/100**; GPA: **3.96/4.00**; Rank: **4/310**; eligible for recommendation-based graduate admission.

INDUSTRY EXPERIENCE

Galbot Post-Training Algorithm Intern · On-site Aug. 2026 – Present

- Work on **RL post-training for VLA models** within HIL-VLA across LIBERO, LIBERO-plus, RoboTwin 2.0, and RoboCasa365, covering environment integration and end-to-end pipeline validation.
- Lead the development of a **Real2Sim2Real** training pipeline integrating real-to-sim data generation, expert rollouts, VLA fine-tuning, online RL, and closed-loop evaluation.

RESEARCH EXPERIENCE

Shenzhen-Hetao Institute Research Assistant · On-site Jun. 2026 – Aug. 2026
(SLAI)

- Studied **policy post-training with frozen world models**, improving policies without additional environment interaction.
- Achieved **3.8%–5.2% aggregate gains** and a **+5.0 pp MT50 success rate** with only **0.1%–0.7% additional training compute**.
- **Better Policies from Short Comparisons: Minimal Post-Training with Frozen World Models**

Zheng Lu, Rui Huang, Lingbei Meng, Tinghao Wang, Bofan Zhu, Bowen Han, Yuxi Lu, Yiran Li, Peize He, Yaodi Luo, Zhengbo Jiao, Lian Zhang, Jianqing Zhu

First author · Under review at AAAI 2027

Peking University · Shanghang Research Assistant · Remote May 2026 – Jul. 2026
Zhang Group

- Reformulated **MLLM visual token pruning** as constructing a **Token Optimal Preservation Set (TOPS)**, deriving three objectives from an information-theoretic perspective.
- Co-developed a **training-free** multi-stage pruning method evaluated on **7 MLLMs and 14 benchmarks**; LLaVA-NeXT retained **100.0% / 100.6%** performance after pruning **77.8%** of visual tokens.
- **TOPS: First-Principles Visual Token Pruning via Constructing Token Optimal Preservation Sets for Efficient MLLM Inference**

Tinghao Wang, Yichen Guo, Rui Huang, Zheng Lu, Junchi Yao, Qizhe Zhang, Yuan Zhang, Jiajun Cao, Zhirong Shen, Yaosong Du, Lijie Hu, Shanghang Zhang

Fourth author · Submitted to EMNLP 2026

Shanghai Jiao Tong University Research Assistant · Remote Mar. 2026 – May 2026
· Linfeng Zhang Group

- Studied **Narrative Lock-in (NLI)** in long-horizon agents, where early erroneous beliefs persist and bias subsequent planning, tool use, and verification.
- Co-developed **Nexus**, an external supervision framework that maintains structured task states and checks claim–evidence–action consistency to detect and correct trajectory deviations.
- **Let It Go: Narrative Lock-in in Open-ended Real-Life AI Agents**

Bofan Zhu, Rui Huang, Zhirong Shen, Chang Zou, Xingyu Yue, Zheng Lu, Xin Ma, Chenhang Cui, Linfeng Zhang

Poster · FAGEN Workshop at ICML 2026

HONORS & AWARDS

- Provincial Second Prize, National High School Olympiad, 2024;
- First Prize, Central & Northwest China, “Telling China’s Stories in English”, 2025;
- Third Prize, UESTC Mengsheng Cup Electronic Design Competition, 2025;
- Third Prize, UESTC Xintong Cup Electronic Design Competition, 2025;
- Honorable Mention, **Mathematical Contest in Modeling (MCM)**, 2026.
